

IFNA International Research Collaboration Subcommittee of the IFNA Research Committee Meeting Agenda <u>12 March 2019–0700 EST</u> Please note: Call in information below

Present: Petra Brysiewicz South Africa), Cindy Danford (USA), Helene Moriarity (USA), Suzanne Feetham (USA), Sonja Meier (USA), Lindsay Smith (Australia), Veronica Swallow (England)

Regrets: Sandra Eggenberger, Junko Honda, Wendi Smith, Susan Sullivan-Bolyai

Conveners: Cindy Danford (USA) & Petra Brysiewicz (South Africa)

Call to Order: 0705 EDT (New York)

1. Welcome	Timing of meetings: Discussed purpose of changing the meeting time to 0700 as a means to accommodate those in other time zones around the world. To date this has not changed attendance,			
	however holiday time for some countries extended through			
	January. Plan to try 1-2 more meetings at 0700, before			
	reconsidering. This time works for Australia, presently 2200, but with an upcoming time change will be 2300 for the April meeting.			
2. Member Updates on Current	Cindy : Launching an NIH R21 study exploring use of event history			
Research Projects	calendars as a self-regulation approach to set goals related to			
	healthy eating, activity, and sleep with preschool children and			
	parents. Just returned from National Pediatric Nurse Practitioner			
	Conference (NAPNAP), completing 2 workshops and fine tuning a			
	related publication. Helene : Recently submitted an R34, an RCT to evaluate			
	behavioral activation to reduce depressive symptoms in veterans &			
	civilians with traumatic brain injury. Attended the Elizabeth Dole			
	Foundation conference in Washington D.C. Focus of this			
	foundation is to provide increasing support for families of veterans			
	and active military. Families are recognized through this group as			
	'hidden heros." Lindsay: Last year was involved with research on the wellbeing of			
	children and youth and how this effects policy in Australia.			
	Identified how to look at 5 areas of wellbeing to determine how			
	Australian children are doing. Results indicated that 25% of			
	children have high wellbeing in all areas of development; yet, 1 in			
	5 children have some deprivation in up to 3 of 5 developmental			
	areas. Refer to this link for more information on this research			
	report, 'To have and to have not: Measuring child deprivation and opportunity in Australia,' <u>https://www.aracy.org.au/publications-</u>			
	resources/area?command=record&id=282			
	Petra: Working with a post doc on measuring family experience in			
	the ED. Doing a scoping review, exploring the best tools to			
	accomplish this. Planning to looking at EDs across South Africa.			
	Sonja : Working on IFNC 14 conference planning as primary focus.			
	Working with Dr. Eggenberger on article. Involved in local project			

	on supporting children & caregivers in situations of substance abuse; a community based, interdisciplinary project. Will be interviewing children and caregivers to hear their stories and how families are effected. Suzanne : Blog #2 on policy is forthcoming. Related to policy regarding opioids, encourage those in US to work with legislators to hold pharmaceuticals responsible for contributing to the opioid crisis. ARC has come out with science policy recognition. Look for the link on the press release for the ARC challenge for social determinants of health. This reinforces the relevancy of the IFNC 14 focus on science policy. Note: the journal, <i>Family Systems in</i> <i>Health</i> has published an issue including: how to write a policy brief, family issues in review, frontier of family policy, evolution of family policy, policy as influence with legislators. See this as a strong reference for future work on policy.	
2 Additioner Enture Diene/Neede	apps for children and families with long term conditions. This is an update of a previous review checking effectiveness of apps. Coming to completion is a UK island IFNA chapter survey of families (N=> 700) using the tool, Families Importance in Nursing Care – Nurses' Attitudes (FINC-NA), analysis is in process with results to come. Also, working on an application for funding through Connect for Children, European clinical trials. Exploring treatment for children with Kawasaki disease in approximately 300 children and parents in 30 contries.	
3. Additions: Future Plans/Needs	-Discussed developing list of funding agencies/ opportunities for funding relevant for families. Noted that often funding priorities r/t families are not well defined. Plan to include relevant FOAs to agenda announcements: Important note: Consider how to frame the science for the funder? FOA on family self-management r/t chronic illness (NINR) to be sent out by Helene.	
	-Add update from research committee, so it is clear how the Research Committee and Itn'l Research Collaboration Subcommittee interface	
	-Committee minutes are forthcoming	
Communication	I Bala Balata for the menual attention by the	
4. IFNA Communications	Highlights for the newsletter/website	
5. Summary statement to add to the template for the minutes	The IFNA International Research Collaboration Subcommittee, a subcommittee of the IFNA Research Committee, provides an opportunity for family nursing researchers from around the world to interact regularly, plan and disseminate conduct collaborative research projects.	
	-Discussed and modified above statement to be added to future agendas	
6. Added: Research committee report summary by Helen M.	 Presently reviewing discrepant scores from abstracts for IFNC 14 due to variations in scoring; need to provide instructions to distinguish different types of work. Late breaking call for abstracts went out. Critiquing 10-12 family measurement tools for presentation at IFNC 14 	

-Working to expand resources section of IFNA website. Thinking		
about how to find and retrieve information more easily. Group approach versus subcommittee report		
A1. Manuscript Update: Sonja & Cindy Manuscript close to being ready to submit; finetuning edits. Also need to discuss how to begin preparing for presentation at IFNC 14. Need to confirm with Birte that the submitted abstract was accepted.		
 A2. Update: Sandra Eggenberger (USA), Petra Brysiewicz (South Africa) Purpose: To discern nurses' descriptions and practices of family engagement in the adult intensive care units (ICUs) from a global perspective. The group continues to move forward with finishing IRBs. Data collection is in process in some countries. They will be presenting at the IFNC 14 conference. 		
A3. Update: Cindy Danford: Request to meet has been sent out. Planning to meet in the next few weeks. Let others interested know of the pediatric research group and have them contact Cindy to join. Original group consisted of seven participants representing Ireland, Australia, Brazil, & the U.S. Veronica expressed interest in participating.		
A4. On hold: S. Eggenberger, E. Hagedoorn, B. Ostergaard		
B. Areas related to policy for future discussion; Potential for collaboration. Please see: Suzanne Feetham's Blog on Policy: <u>https://internationalfamilynursing.org/blog/</u>		
Discussion: Lindsay commented that in addressing how our research can inform future good policy development it is important to identify how current policy has brought us to the point we are at. Note that "old" policy can have good impact. Suggest including how policy has influenced research in the past. Need to consider present positive & negative policy change as well as how policy can be enhanced. Suzanne reminded us that in writing a proposal we need to start with "the hook," or "the why" the research is significant, how policy supports or does not support our work. Background of proposals could include policies that have or have not supported our families. How policy contributes to changing work is needed. Our families are often in the situations they are in due to policy. Our families are progressing forward and we need to recognize the good advances that <u>have</u> been made as well as what <u>can</u> be made. Local, state, and national policies that can protect our families need to be considered. E.g. child abuse or families in the military. It is often unclear how policy fits. Having examples helps us to move forward with more direction so we are not working off a blank slate. We need to think more about the influence of policy on our research and visa versa. Continue discussion at meeting in April.		

Webinars				
8. Future Webinar Topics	Potential topics & potential presenters?			
	Think about possible webinars for after IFNC 14			
New Business	Democrated a machine time for a busic sector state of ICNO 44			
 Int'l Research Collaboration Subcommittee Business 	Requested a meeting time for a business meeting at IFNC 14			
meeting at IFNC 14	-Goals for the next 2 years: Suggestions			
Ū Ū	-Potential future outcome & Next step			
	e.g. Translating research & practice to policy;			
	Suggestions for next global study (e.g. building on "Defining Family")			
	Translational Science			
 A. Networking @ IFNC 14 for doctoral students 	Requested a meeting time for doctoral students; Proposed title of meeting, "Doctoral Student Engagement meeting."			
	-Goal is to provide a venue for networking for doctoral students			
	Wendi Smith has suggested this idea and is willing to lead the			
	group. Julie, who is working with Sandra Eggenberger, is also willing to help.			
	It was noted that at the family nursing research workshop –			
	participants indicated interest in a student engagement meeting at			
	the next family conference.			
Announcements				
B. Announcements: See IFNA	13-16 August 2019. 14 th International Family Nursing Conference.			
website for details. And	Social Determinants of Family Health: Expanding Family Nursing			
conference updates.	Capacity. Hyatt Regency Capitol Hill. Washington, DC, USA.			
Miscellaneous				
8.0ther Topics for discussion now				
or in the future				
Future Meetings				
9. Future Meeting Dates & Times	See below.			
	Times to meet:			
	0600 Minnesota			
	0700 New York 1200 London			
	1300 Denmark, The Netherlands			
	1400 South Africa			
	2100 Japan			
	2200 Australia			

10. Next meeting:	Please join the meeting from your computer, tablet or smartphone. (A			
	headset is recommended)
